

Research and Review articles in Pharmaceutical Sciences

Journal of Pharmaceutical and Pharmacology Research publishes research findings for advancing knowledge in drug development, formulation, drug discovery system, pharmaceutical experimental results, pharmaceutical innovation, pharmaceutical technologies, biopharmaceuticals, research in innovative drug delivery, pharmaceutical industry trends, nanotechnology in pharmaceuticals and more. The journal publishes articles in the form of Research Article, Review Article, Mini Review, Original Article, Short Commentaries, Editorials, Image Article, Case Report and Video Research Article on topics of Pharmaceutical Sciences. These articles present original research findings and are widely read by scientists, healthcare professionals, and industry experts.

Pharmaceutical sciences is a broad interdisciplinary field focused on the discovery, development, production, and regulation of medications. It integrates knowledge from various scientific disciplines such as chemistry, biology, pharmacology, and engineering to study how drugs are designed, delivered, and used in clinical practice. Pharmaceutical sciences play a crucial role in improving healthcare outcomes through the development of safe, effective, and high-quality medications.

Kindly visit the [Instructions for Authors](#) page for detailed article preparation guidelines, information on the process of publication, article processing charges (APC), patient consent, confidentiality, and more.

Manuscript Submission

Authors are requested to submit their manuscript by using Online Manuscript Submission Portal: <https://www.pharmaresearchhub.com/submit.html> (or) also invited to submit through the Journal E-mail Id: editor@pharmaresearchhub.com.
